

Group Name: Olympus OMD Micro Four-Thirds Users Group

Facilitator: Evelyn Jacob

Group Size: Open, although a maximum of about 10 at a meeting is a practical maximum

Skill Level/Other Requirements: Some working knowledge of features of the Olympus OMD for sharing

Location: 9500 Falls Bridge Lane, Potomac, MD (Evelyn's home)

Days/Dates/Time: No set day/time; facilitator polls participants to identify a day and time that works for the most number of participants.

Number of Sessions/Frequency: Group meets on an "as needed" basis, for example, after a new firmware update or a new model.

Equipment Needed/To Be Used: Facilitator does not need equipment at this point.

Description/Approach: The central focus of the group is the OMD EM-1 (original and Mark II), and to the extent that other models' features are consistent with it, they are addressed as well. This is a peer-sharing (no explicit instructor) group where each participant brings at least one tip or technique to the meeting to share. If the information involves menu items, participants are expected to provide handouts so the group does not spend its time writing down complicated steps. After all the tips/techniques are shared, there is time for Q&A among participants.
