Brief Description of Content/Approach:

Make a commitment to your art. Whether you want to create a meaningful body of work, be a member of a gallery, or put together a web site or artist's book, or you must first discover the reason your work is different from others. Sarah will encourage everyone to become active shooters in order to discover your inner voice.

This class will ask you to define your artist goals by creating and editing your photography into a meaningful portfolio. We will write artist statements as a tool to help refine your vision, and help each other to choose a lead image. We will work together to nurture and push the boundaries of your art.
